Native EventVLA: event-memory interventions

Seed 100000
True red: #3
Donor red: #4

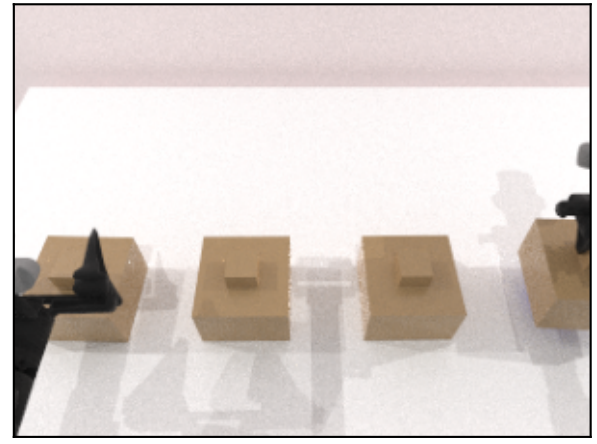

Keep original events
First lift: #3 (correct)

Remove all events
First lift: #1 (wrong)

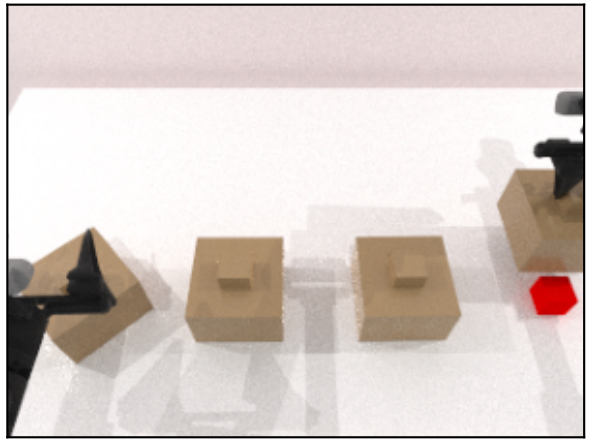

Swap donor event images
First lift: #4 (wrong)

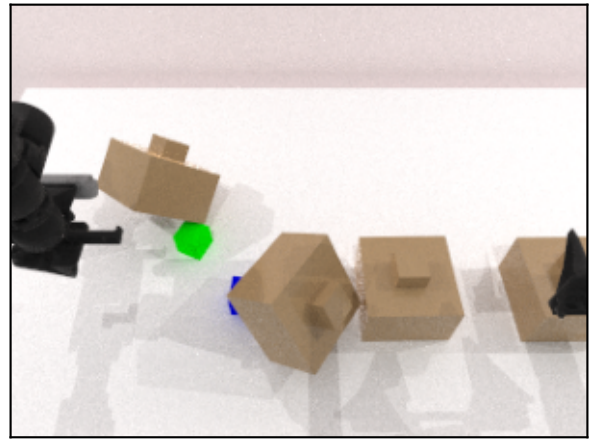

Seed 100001
True red: #4
Donor red: #3

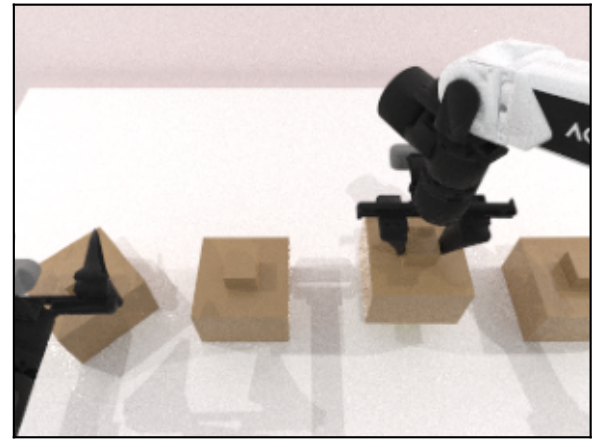

Keep original events
First lift: #4 (correct)

Remove all events
First lift: #1 (wrong)

Swap donor event images
First lift: #3 (wrong)

Covers numbered left to right, 1-4. Terminal frames differ in time: wrong first lifts were stopped early.
Two selected parent states; this is a first-choice diagnostic, not a full-task success benchmark.
